

ADITYA KUMAR

DATA ANALYST

Dhanbad, Jharkhand, India | +91-9570170781 | adityakumar1234yyy@gmail.com

LinkedIn: [linkedin.com/in/aditya-kumar-analytics](https://www.linkedin.com/in/aditya-kumar-analytics) | **GitHub Portfolio:** github.com/adityakumar1234yyy-cloud

PROFESSIONAL SUMMARY

Data Analyst and Mathematics graduate with hands-on experience analyzing 4.24M+ records using Python, PostgreSQL, R, and Excel. Skilled in data cleaning, exploratory data analysis, statistical analysis, SQL-based reporting, visualization, and reproducible workflows. Google Data Analytics Professional Certificate holder with experience translating raw data into clear customer and operational insights.

TECHNICAL SKILLS

SQL & Databases: SQL, PostgreSQL, data querying, aggregation, data validation

Programming: Python (pandas, NumPy, Matplotlib), R, RStudio, R Markdown

Visualization: ggplot2, Tableau, Matplotlib, data storytelling and executive reporting

Spreadsheets: Microsoft Excel, Google Sheets, PivotTables, VLOOKUP, INDEX/MATCH, advanced formulas

Analytics: EDA, statistical analysis, data cleaning, missing-value handling, duplicate resolution, KPI reporting

PROJECT EXPERIENCE

Cyclistic Bike-Share Customer Behavior Analysis | Python | PostgreSQL | R | Excel | 2026

- Processed and validated 4,244,891 trip records from five quarterly CSV datasets; removed 2,362 invalid-duration rows and retained 4,242,529 clean records for analysis.
- Built a reproducible Python cleaning pipeline and PostgreSQL analysis workflow to evaluate rider type, ride duration, weekday, hourly, monthly, station, and route patterns.
- Found that members accounted for 78.1% of rides, while casual riders averaged 39.3-minute trips versus 12.8 minutes for members, revealing distinct customer usage patterns.
- Generated analysis tables and visual summaries to support customer-segmentation, membership-conversion, and operational recommendations.

Exploratory Data & Visual Analysis | R | RStudio | Excel | Google Data Analytics Track | 2026

- Cleaned structured datasets by resolving missing values, duplicate entries, and inconsistent formats, then performed EDA using descriptive statistics, correlations, and distribution analysis.
- Created ggplot2 visualizations and reproducible R Markdown reports that translated analytical findings into concise, non-technical summaries.

Titanic Survival Analysis & Predictive Modeling | R | tidyverse | ggplot2 | caret | Logistic Regression | 2026

GitHub Project: github.com/adityakumar1234yyy-cloud/virtual-r-data-analyst-titanic-project

- Cleaned and transformed Titanic passenger data using median imputation, categorical encoding, feature engineering, and exploratory visual analysis of survival patterns.
- Performed Pearson chi-squared hypothesis testing and trained a logistic regression model using a 70/30 train-test split, achieving 77.4% test accuracy.

CERTIFICATIONS

Google Data Analytics Professional Certificate | Google / Coursera | Aug 2026 | Credential ID: RNT72OKMOPYM

Virtual R Data Analyst Intern - Certificate of Experience | YuvaIntern | Issued Aug 21, 2026

EDUCATION

Bachelor of Science (B.Sc.) in Mathematics (Honours) | 2021–2024

Binod Bihari Mahto Koyalanchal University, Dhanbad

Relevant Coursework: Applied Statistics, Linear Algebra, Calculus, Numerical Methods, Differential Equations

Languages: English - Professional Working Proficiency | Hindi - Native / Full Professional Proficiency
